DETAILED ACTION

Reasons for Allowance

Claims 1-13, 16-25 and 28-36 are allowable as evident by applicant's amendment filed 07/22/2008 (Claims are renumbered as 1-30, respectively).

The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a nonobvious improvement over the invention in closest prior arts of record. The improvement comprises the steps of transmitting grant messages to a number of remote nodes, wherein a grant message for a specified remote node assigns a start time and a duration of a transmission timeslot in which the specified remote node may transmit a upstream data burst; and receiving a number of upstream data bursts, wherein the time gap between two consecutive upstream data bursts is less than the summation of a default laser turn-on time, a default laser turn-off time, an automatic gain control (AGC) period, and a clock and data recovery (CDR) period; wherein a preceding upstream data burst's laser turn-off period overlaps with a subsequent data burst's laser turn-on period; wherein the non-overlapping portion of the preceding data burst's laser turn-off period is equal to or greater than twice the allowed maximum jitter of the round-trip time between the central node and a remote node; and wherein the non-overlapping portion of the subsequent data burst's laser turn-on period is equal to or greater than twice the allowed maximum jitter of the round-trip time between the central node and a remote node.
